Our CIPM Training Course (IAPP- Certified Information Privacy Manager) is the world's first and only certification in privacy programme management.

The CIPM Training Course provides you with the knowledge to make a privacy programme work for your organisation, enabling you to become the go-to person for day-to-day operational aspects of data protection & privacy, within a role such as a Data Protection Officer (DPO) or Data Protection Manager.

As an Official IAPP training Partner, JAW Consulting UK is uniquely positioned to deliver both theory and practical guidance of complying with the EU GDPR and UK DPA.

There is no better way to understand how to run a privacy program and/or privacy office than by enrolling on our CIPM Training Course (IAPP Certified Information Privacy Manager) and obtaining a world-renowned, ANSI/ISO-accredited certification.

The CIPM program was developed by the International Association of Privacy Professionals (IAPP), which is the World's largest comprehensive global information privacy community and resource. The CIPM certification also holds accreditation under ISO 17024: 2012.

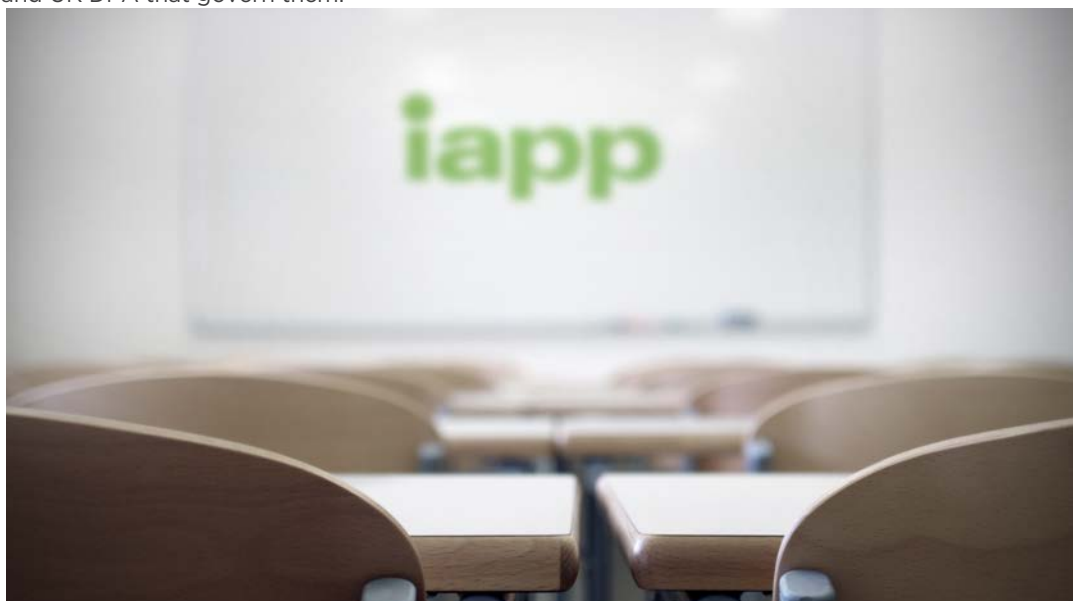

When you earn the CIPM credential you are joining a highly respected group of knowledgeable, capable and dedicated data protection & privacy leaders —and to take advantage of the career opportunity this sweeping legislation represents. Add the CIPP/E credential and demonstrate that you not only can manage a data protection programme, but you also understand the underlying regulations such as the EU GDPR and UK DPA that govern them.

Key Benefits

- The CIPM is the global industry standard for privacy professionals holding leadership roles within a privacy program or privacy office.
- Be recognised as an experienced privacy program manager and/or data protection officer.
- The CIPM is a highly respected amongst top employers hiring and promoting privacy professionals.
- Achieving a CIPM credential demonstrates understanding of a how to implement a privacy programme within your business, and the day-to-day operational aspects required running a privacy office.
- Be recognised as part of a respected group of knowledgeable, capable and dedicated privacy and data protection practitioners.
- Elevate your leadership profile among colleagues and peers by holding the CIPM designation

What Will I Learn?

The CIPM training course was developed by the IAPP and shows that you have a practical and comprehensive knowledge of how data protection programmes should work across an organisation.

The CIPM training course is broken into ten key modules:

Module 1: Introduction to Privacy Program Management

Identifies privacy program management responsibilities, and describes the role of accountability in privacy program management.

Module 2: Privacy Governance

Examines considerations for developing and implementing a privacy program, including the position of the privacy function within the organisation, role of the DPO, program scope and charter, privacy strategy, support and ongoing involvement of key functions and privacy frameworks.

Module 3: Applicable Laws and Regulations

Discusses the regulatory environment, common elements across jurisdictions and strategies for aligning compliance with organisational strategy.

Module 4: Data Assessments

Relates practical processes for creating and using data inventories /maps, gap analyses, privacy assessments, privacy impact assessments/data protection impact assessments and vendor assessments.

Module 5: Policies

Describes common types of privacy-related policies, outlines components and offers strategies for implementation.

Module 6: Data Subject Rights

Discusses operational considerations for communicating and ensuring data subject rights, including privacy notice, choice and consent, access and rectification, data portability, and erasure and the right to be forgotten.

Module 7: Training and Awareness

Outlines strategies for developing and implementing privacy training and awareness programs.

Module 8: Protecting Personal Information

Examines a holistic approach to protecting personal information through privacy by design.

Module 9: Data Breach Incident Plans

Provides guidance on planning for and responding to a data security incident or breach.

Module 10: Measuring, Monitoring and Auditing Program Performance

Relates common practices for monitoring, measuring, analysing and auditing privacy program performance.

What Will I Achieve?

- Understand how to create a vision for data privacy within your business, and structure your privacy team.
- How to develop and implement a privacy program framework.
- Gain the confidence to interpret privacy regulations and make them work for an organisation.
- Understand best practice approach to establish, maintain and manage a privacy program across all stages of its lifecycle.
- How to measure the performance of your privacy program, and communicate with business and external stakeholders.
- You will be eligible to sit the IAPP exam to attain CIPM qualification (booked via the IAPP website).
