

EU GDPR Compliance Services

Data breaches are increasingly making weekly headlines of national newspapers. Whether a breach is accidental or malicious in nature, performed by an insider or an external attacker, it is the loss of data which causes the reputational and often large financial impact to the business.

Organisations have for a long time been playing catch-up in regard to data security and protection. Due to a number of high profile data breaches, industry regulation is increasing its focus on ensuring organisations have in place appropriate protection for personal data.

Under the EU GDPR (General Data Protection Regulation) adopted on 27th April 2016 (enforceable 25th May 2018) organisations handling EU citizen data can now be expected to be fined up to €20 million or 4% of global annual turnover for the preceding financial year, whichever is the greater. They must also only maintain data as long as necessary, identifying and notifying all affected individuals within 48 hours in the event of a breach.

The UK ICO is seeking to align UK legislation and penalties against the regulation under the UK Data Protection Bill (UK DPB).

This represents a challenge for organisations without visibility and control of the type of data they handle, where the data is located and applicable regulations.

The UK's decision to leave the UK, or 'Brexit' has introduced uncertainty about GDPR, however the ICO has made it certain the UK will enact into UK Law either exactly as the GDPR and may make additional requirements. This is because to trade with Counties of the the EU will require compliance with GDPR as the minimum.

Now is the time to implement appropriate data security measures to locate, identify and protect sensitive business and personal data within your organisation, enabling compliance with applicable legislation such as the EU GDPR and UK DPB (Data Protection Bill).

Every organisation is different. Our approach is to tailor the solution for you to meet GDPR with comfortable changes to your established processes. We do not shoe-horn you into a proprietary solution that might not fit well with your business or culture.

JAW Consulting UK can help organisations to understand what they need to do to get ready to comply with the GDPR, and continue that support if required, into managing the changes necessary be ready for May 2018 when the GDPR takes effect.

A full legal service is also available, upon request.

EU GDPR Readiness Assessment

Our EU GDPR Readiness Assessment provides your business with a review of current practices against the obligations of the EU GDPR, and provides the basis on which your business can plan to achieve compliance.

Following this review, we present back our findings in a clear business level executive report highlighting current compliance level, short-term recommendations, and a full high-level strategic roadmap for your business to achieve full compliance with the EU GDPR.

EU GDPR Data Inventory & Data Mapping

Our Data Inventory & Data Mapping Service involves works closely with key business stakeholders, establishing a central register of all business processes involved in the processing of personal data. Data Mapping gathers detailed information such as dependent applications, systems, cross-border data flows, data types (PII or Sensitive PII), consent etc.

With a Data Inventory established, your business can more clearly assess any changes required to ensure each business process meets and remains compliant, with the EU GDPR.

EU GDPR Data Discovery

Our EU GDPR Data Discovery service aims to identify personal data which may have been missed during the establishment of a Data Inventory, highlighting additional areas of high-risk requiring remediation.

Using our specialised PII discovery software, our Data Protection & Privacy consultants will perform a deep scan across your entire environment, identifying non-compliant storage of personal data.

Data Classification

Our Data Classification Service supports your business establishing an appropriate Data Classification Policy and implementing an intuitive Data Classification Tool, providing business users with a clear and consistent means to apply a classification label to any personal & sensitive data which they create, store and transmit.

With a classification label visible when printed and metadata readable by technical tools, both employees and existing data security tools such as DLP (Data Loss Prevention) and encryption technologies, can work together, ensuring personal data is protected at all times.

EU GDPR Training & Security Awareness

Your employees play a key role ensuring Personal Data is provided the level of protection required. They need to understand that they are accountable for meeting the data protection requirements set forth in the General Data Protection Regulation (GDPR).

With our GDPR Training and Awareness Service, end users will learn why they need to be active participants in overall GDPR compliance; how to make the right decisions about the data they create and handle; and what the consequences of non-compliance are for your organization.

EU GDPR Programme Review

Our EU GDPR Programme Review Service provides external assurance of planned tasks and activities for adequacy while assisting your business with focusing on tasks of high importance, bringing priority to what can be a long list of remediation activities within an existing GDPR Programme.

Working closely with delivery teams, we perform a detailed gap analysis against planned & implemented tasks, defining a prioritised roadmap, and identify any additional activities which may be required. A periodic/ongoing a review of progress can also be provided, ensuring your GDPR Programme remains both on track and on budget.

EU GDPR Framework Implementation

The EU GDPR Framework Implementation Service is focused on providing the necessary resource and management necessary to deliver your Privacy Management Program, with alignment to the BS10012 for the Personal Information Management System (PIMS).

Our Data Protection & Privacy Consultants work with your business to implement the necessary governance, tools, policies, and procedures to enable you to meet and maintain compliance with the EU GDPR.

EU GDPR Privacy Impact Assessment (DPIA) Implementation

Under EU GDPR, businesses are required to ensure data privacy risks are identified and addressed at an early stage in their products, applications, and systems lifecycle.

Our EU GDPR Privacy Impact Assessment (DPIA) Implementation Service, assists your business with implementing the necessary operational processes and documentation required to support the DPIA process under business-as-usual.

Virtual DPO

With certain businesses required to appoint a Data Protection Officer (DPO) under GDPR, it is not uncommon for them lack the resources and expertise necessary to undertake this important role adequately.

Our Virtual DPO service is an efficient and cost effective support models, providing a privacy expert on a retained basis, taking the lead on privacy matters, being the focal point or go-to person for management and staff on privacy concerns.

With a number of support options available, we can provide accountability for adequacy of the organization's privacy arrangements as a whole, including your privacy framework, supporting DPIA's, Privacy By Design (PbD) Assessments, Privacy Awareness Training and compliance with privacy-related obligations.

Privacy Management Platform

Our Privacy Management Platform is a secure online (Cloud or On-Prem) tool assisting you with both managing transition to GDPR, and on-going daily activities such as Data Inventory, Data Privacy Impact Assessments (DPIA), Vendor Risk Management, Data Breach Notification and Subject Access Requests and workflows in remain in compliance

Offering significant benefit over a traditional spreadsheet-based approach, it simplifies management and automates record keeping to demonstrate clear compliance to regulators and auditors.

We provide a simple step-by-step methodology to fast-track business enablement of compliance with EU GDPR.

Phase 1 Assess	EU GDPR Readiness Assessment
